### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bruce Prout on September 5, 2006.

The application has been amended as follows: Canceled claim 18.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The claims are allowable over the prior art of record because the teachings of the references taken as a whole do not teach or render obvious the combination set forth, including that of a lock having a housing with first and second portions, where the first portion has mechanical components and the second portion having a selectively removable electronics module.

The closest prior art of record, U.S. Patent Number 4,833,465 to Abend et al., disclose a locking assembly having a housing with mechanical components the comprise a bolt, a retaining pin and a key operated lock, as well as an electronic module having a power supply, a wireless transceiver and antenna means. However, Abend et al. do not disclose the electronics module being removable.

Art Unit: 3676

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to electronic locking mechanisms:

U.S. Patent Number 6,539,755 to Bruwer et al., U.S. Patent Number 6,418,763 to Huang, U.S. Patent Number 5,791,179 to Brask, U.S. Patent Number 5,377,513 to Miyamoto et al., U.S. Patent Number 4,995,248 to Liu.
